

# **AI-Powered E-Commerce Website – Shopping With AI**

<https://shopping-with-ai.my.canva.site/dagybnsn-xu>

**Presented by:** Karanam Swathi

---

## **1. Introduction**

### **What is Shopping With AI?**

- AI-integrated e-commerce platform.
- Helps users find products quickly and efficiently.
- Offers personalized product recommendations using AI.

**Visual suggestion:** Homepage screenshot or AI chatbot illustration.

---

## **2. Problem Statement**

### **Challenges in Traditional Online Shopping:**

- Difficulty in finding desired products quickly.
- Overwhelming number of product choices.
- Lack of personalized guidance.

**Visual suggestion:** Frustrated user or cluttered website image.

---

## **3. Our Solution**

### **How Shopping With AI Solves These Problems:**

- AI chatbot assists in product search.
- Smart recommendations based on user behavior.
- Simplified and faster checkout experience.

**Visual suggestion:** Flowchart: User → AI Chatbot → Product → Checkout.

---

## 4. Key Features

- AI-powered product search & recommendations.
- Interactive chatbot for guidance.
- Quick and secure checkout process.
- Responsive design for mobile and desktop.

**Visual suggestion:** Icons for AI, chat, security, mobile.

---

## 5. Technology Stack

- **Frontend:** HTML, CSS, Bootstrap, Canva AI tools.
- **AI Integration:** OpenAI API for chatbot functionality.
- **Deployment:** Canva website platform.

**Visual suggestion:** Tech stack icons or diagram.

---

## 6. How It Works

### User Journey:

1. User visits the website.
2. Interacts with AI chatbot.
3. Receives product recommendations.
4. Adds items to the cart.
5. Proceeds to checkout.

**Visual suggestion:** Step-by-step arrows or flow diagram.

---

## 7. Benefits

- Saves time in product search.
- Personalized shopping experience.
- Reduces decision fatigue.

- Seamless and user-friendly interface.

**Visual suggestion:** Happy customer illustration or stats infographic.

---

## 8. Future Scope

- Integration with payment gateways for direct transactions.
- More advanced AI features (voice assistant, image search).
- Multi-language support for global users.

**Visual suggestion:** Growth arrow or roadmap illustration.

---

## 9. Demo / Screenshots

- Homepage view.
- AI chatbot interaction.
- Product page.
- Checkout page.

**Visual suggestion:** Embed screenshots or GIF of live demo.

---

## 10. Conclusion

- *Shopping With AI* simplifies online shopping with AI.
- Enhances user experience with smart recommendations.
- Ready to scale with more features in the future.

**Visual suggestion:** Thank you image or website logo.

---
